mine first-class holating works, consisting of a steam engine with the necessary gearing attached; two sets of boilers, one of which has expanity to work the mine is a depth of 2,500 feet, unless water in to a depth of 2,500 feet, unless water in consider bie quantity is met with, in which case additional machinery will be required. The new buildings erected at the mine are the main engine house, blockswith shop and coalboder-house, blackswith shop and coalboder-house, together with improvements on the curpenter shop and ore-house. The Lightner shaft has attained a depth of 1,070 feet. To the depth of 900 feet it consists of but two compartments; at that consists of but two compartments; at that consists of third compartments at that interest. I have levied on the following property, to wit:

with a will being outs from this term of the court of the mills. Both mills are in as high a state of efficiency as can be desired. The water pipes leading from the spring to the mills (a distance of one and a quarter miles) have been placed under ground, by which a regular supply of water is furnished the mills. The Nevada Central Radiroad has been of great benefit to the company in affording cheap and sure transportations of ore at all seasons—a saving thus far of about \$35,000, as compared with team rates, has been made.
